01

CHAPTER 1

Why Digital Products on Etsy Work

The business model that scales with zero inventory

Etsy has 89 million active buyers — people already in purchase mindset, already trusting the platform. Digital products have 90%+ margins, instant delivery, and zero fulfillment cost. The combination is one of the most accessible passive income models ever created.

◆ The Digital Product Advantage

Create once. Sell forever. No shipping. No returns. No inventory. A single template that took you 3 hours to make can sell 1,000 times with zero additional work.

02

CHAPTER 2

Finding Your Profitable Niche

Demand research that finds what's actually selling

The research process: Step 1: Search Etsy for your category. Sort by 'Most Relevant.' Look at the top sellers — how many sales do they have? Step 2: Use eRank.com (free tier) to see search volume for Etsy keywords. Look for keywords with 1,000+ monthly searches and fewer than 5,000 competing listings. Step

3: Check the reviews on top-selling products. What do buyers say they love? What do they wish was different? That gap is your opportunity.

03

CHAPTER 3

Best-Selling Digital Products 2026

What's actually moving with real data

Consistently strong categories: Notion templates (life planners, business systems), Canva templates (social media, presentations, business cards), budget trackers and financial spreadsheets, resume templates (industry-specific outsell generic), educational worksheets and lesson plans, wedding planning templates, business planner bundles, printable wall art (less competitive in specific niches). Avoid: generic planners, generic resume templates, any category flooded with similar-looking products.

04

CHAPTER 4

Creating Products with AI

From idea to finished product in hours using AI tools

Workflow for Canva templates: (1) Research top sellers → (2) Identify what's missing → (3) Use ChatGPT to generate content for the template (dates, prompts, categories) → (4) Design in Canva using their template builder → (5) Export as Canva template link → (6) Package with instructions PDF created in Canva. Workflow for Notion templates: (1) Build in Notion → (2) Duplicate as template → (3) Record a

Loom walkthrough → (4) Write instructions with AI → (5) Package.

05

CHAPTER 5

Pricing for Maximum Sales

The psychology of Etsy pricing

Etsy buyers are looking for value — not the cheapest option. A \$3 template feels disposable. A \$12 template feels like a real purchase. A \$27 bundle feels like a bargain if it's 5 templates packaged well. Price strategy: start at \$7–15 for single products, \$19–35 for bundles. Run a sale at launch (40% off) to generate initial social proof. Raise prices once you hit 10+ reviews.

06

CHAPTER 6

Listings That Rank

Etsy SEO: titles, tags, and descriptions that drive traffic

Etsy SEO works on keywords — the words buyers type when searching. Title formula: [Primary keyword] | [Secondary keyword] [product type] | [benefit]. Example: 'Budget Tracker Spreadsheet | Monthly Expense Tracker | Google Sheets Template.' Use all 13 tags. Each tag can be 2–3 words. Mirror your title keywords in tags. Description: First paragraph for humans (benefits, what's included), rest for SEO (repeat keywords naturally).

07

CHAPTER 7

Mockups That Convert

Making your digital product look irresistible

You're selling something invisible — so the mockup is your product's packaging. Best practices: Use professional mockup templates from Creative Market or Canva. Show the product in context (laptop screen, printed on a desk, in a planner). Show multiple angles and pages. Show it being used, not just existing. Use lifestyle images that match your target buyer's aesthetic. Bright, clean, cohesive images consistently outperform dark or busy ones.

08

CHAPTER 8

Your First Launch Checklist

Step-by-step from zero to published

Pre-launch: Product file ready (PDF or Canva link). Mockup images (minimum 5). Title, tags, and description written. Pricing decided. Shop policies written. Launch day: List the product. Share in relevant Facebook groups and Reddit. DM 5 friends asking for feedback. Post on Instagram/Pinterest with product preview. Post-launch: Check Etsy stats daily first week. Adjust if click rate is low (thumbnail problem) or if conversion rate is low (listing problem).

09

CHAPTER 9

Etsy Ads for Beginners

When to use them, how to set them up

Don't run ads until you have: at least 5 reviews, a listing with strong organic click rate, and confidence in your pricing. When ready: start with \$1–3/day. Etsy automatically shows your ads for relevant searches. Track ROAS (revenue/ad spend). Pause ads on products with ROAS below 2x. Increase budget on products showing ROAS above 4x.

10

CHAPTER 10

Building a Portfolio

From 1 product to 50 — without burning out

Month 1: Launch 3 products in one niche. Test what resonates. Month 2: Double down on your winner. Create 3 variations or complementary products. Month 3: Expand the collection. Bundle products at a discount. Long-term strategy: one niche → 20+ products → become the go-to shop for that specific buyer. Diversification comes after depth, not before.

11

CHAPTER 11

Reviews & Repeat Buyers

Turning first-time buyers into fans

After every purchase, Etsy sends an automatic thank-you message. Customize yours to: thank them personally, explain how to access and use the product, invite them to browse your other products, and gently ask for a review if they love it. Offer a 10% discount code for their next purchase. The goal: at least 20% of buyers should become repeat customers within 90 days.

12

CHAPTER 12

Your 30-Day Launch Plan

Day-by-day from setup to first sale

Days 1–3: Niche research complete. 3 product ideas validated.

Days 4–7: First product created. Mockups designed.

Days 8–10: Etsy shop set up. Policies written. About page written.

Days 11–13: First listing live. Tags and title optimized.

Days 14–17: 2nd and 3rd products listed. Social media promotion started.

Days 18–21: Pinterest boards created with product pins. First blog post or Reel.

Days 22–24: Review Etsy stats. Identify what needs improvement.

Days 25–27: First bundle created at 30% discount.

Days 28–30: Share in relevant communities. Optimize lowest-performing listing.
